

cells in addition to the elected intestinal intraepithelial lymphocytes. Although the various types of T cells may vary with respect to their cell surface markers and signaling proteins, nevertheless the searching for all types of T cells as opposed to any one type of T cells is not believed to be burdensome.

Accordingly, Applicant respectfully requests that the Examiner withdraw the restriction requirement as to the type of T cell used in the claimed methods. Should the Examiner not withdraw the species restriction, then Applicant respectfully requests that claims directed to the nonelected species be considered upon the allowance of one or more generic claims.

Respectfully submitted,
Richard S. Blumberg, Applicant
